CLASS GUIDE

stick-word-group 🇺🇸

The WhatsApp bot that turns your class group into a living vocabulary notebook: the class collects words, practices with AI, reviews every day and takes on a challenge every week.

🎁 Trial period: 2 months free

During the trial, the bot is active in the class groups. Everything the class adds is saved, and the engagement ranking shows who took part the most.

1 How the bot works
2 Adding words

5 Daily review
6 Weekly challenge
7 Engagement ranking
8 Class level and audio
9 All group commands
10 Private chat commands (admins)
11 Limits and FAQ

1 How the bot works

The bot is a member of the class group. It stays out of the conversation: it only reads what is meant for it.

What the bot reads in the group

✅ It reads

- Messages that **tag the bot** (type `@` and pick the bot's contact).
- **Replies (quotes)** to a bot message: they count as tagging it.
- **Commands** starting with `!` or `/`, like `!list` or `/list`.
- **Voice notes** that reply to (quote) a bot message.

🙈 It ignores

- The class's normal conversation: the bot doesn't read it, store it or even mark it as read.
- Photos, stickers, videos and audio that don't reply to the bot.
- Tagging or quoting someone else.

Which language it speaks

The bot replies **in English**, in short messages, to keep the immersion. In beginner classes (**A1-A2** and **A2-B1**), each word also comes with the Portuguese translation (the 🇧🇷 line). From **B1-B2** up, nothing appears in Portuguese.

What about private chat?

Studying happens in the group. In private chat, the bot only serves administrators, and only with the admin commands (section 10). If a student messages it privately, the bot **doesn't reply**. It's not a bug, it's on purpose.

The three activities

📚 Vocabulary
any time: someone tags the bot with a word and the class practices

🔁 Daily
Mon to Fri, ~19:00: 5 of the class's words, anyone can answer

🏆 Weekly
Friday, ~13:00: one question per student, with a tag

Answers in the daily review and in the weekly challenge earn points in the **engagement ranking** (section 7).

EXAMPLE: THE BOT IGNORES THE CHAT AND ONLY REPLIES TO WHOEVER TAGS IT

Ana
hey, did anyone watch yesterday's class?

Bruno
yes! the teacher talked about "stall"

Bruno
@bot stall | the talks stalled

bot
stall (verb) — B2
📖 to stop making progress
...

The first two messages are class conversation: the bot doesn't read them. The third one tags the bot.

2 Adding words

Saw a word in class, in a TV show or in a song? Tag the bot with it. The word goes into the class list, and everyone can practice it.

HOW TO SEND IT	EXAMPLE	WHAT HAPPENS
Just the word	`@bot stall`	The AI picks the most common meaning.
Word + the sentence where you saw it	`@bot stall | the talks stalled`	The AI uses the sentence to get the meaning right.
Word + the meaning you want	`@bot stall | to delay on purpose`	The AI explains **that** meaning (Portuguese works too: `stall | enrolar`).
Expressions, slang	`@bot no cap`, `@bot grind to a halt`	Any word at any level works; the AI says when it's slang or informal.
As a command	`!add stall`	Same as tagging the bot.

The word "card"

The bot replies with a card: part of speech and level (CEFR), definition, a memory tip and an example sentence. Right after that, it sends **two voice notes** with the pronunciation: the word and the example sentence.

EXAMPLE IN AN A2-B1 CLASS (WITH THE PORTUGUESE LINE)

Bruno
@bot stall

bot
stall (verb) — B2
🇧🇷 travar, emperrar
📖 to stop making progress
💡 Think of a car engine that dies in traffic.
"The project stalled because the client didn't send the documents."

↔️ enrolar — to delay on purpose
Want another meaning? Tag me with **stall | to delay on purpose**

Now, tag me with a sentence using **stall**, or tag me with a number:
2️⃣ See more examples
3️⃣ Check synonyms
4️⃣ Just save
5️⃣ Don't save

🎤 0:01 · voice note: "stall"

🎤 0:04 · voice note: the example sentence

> 💡 **Other meanings:** the ↔️ line shows the word has more than one meaning. To learn the other one, tag the bot with the word, a | bar and the meaning, just as the card suggests.

A word that's already on the list

If someone sends a word the class already has, the bot doesn't duplicate it: it lets you know and shows what was already saved.

Carla
@bot stall

bot
📌 You already have **stall** in your list.

stall (verb) — B2
📖 to stop making progress
"The project stalled because the client didn't send the documents."

Now, tag me with a sentence using **stall**, or tag me with a number:
2️⃣ See more examples
3️⃣ Check synonyms

To send another word or command, type !0 or !skip.

3 Practicing a word

After the card, the word stays "open". Anyone in the class can write a sentence with it or pick a menu option, always tagging the bot.

YOU SEND	THE BOT DOES
`@bot` + a sentence with the word	Corrects the sentence: says whether the meaning is right, shows the corrections, a more natural version and a short explanation.
`@bot 2` (or `!2`)	3 more example sentences, without repeating the ones already shown.
`@bot 3` (or `!3`)	Synonyms, each with a meaning and an example.
`@bot 4` (or `!4`)	Saves and closes the word, and suggests related expressions.
`@bot 5` (or `!5`)	Discards the word just created. If someone already wrote a sentence with it, it stays on the list.
`@bot` + a question	Answers questions about the word or about English ("how do I pronounce it?", "examples at work").
`@bot` + another word	Saves the current one and explains the new one right away.
`!0` or `!skip`	Leaves the word without deleting anything.

EXAMPLE: CORRECTING A SENTENCE

Ana
@bot The project stalled because the client didn't sent the documents

bot
⚠️ **Almost there!** The meaning is right.
✏️ didn't sent → didn't send
✨ The project stalled because the client didn't send the documents.
💬 After "didn't", the verb stays in the base form.

Want to try another sentence?
Now, tag me with a sentence using **stall**, or tag me with a number:
2️⃣ See more examples
3️⃣ Check synonyms
4️⃣ Just save
5️⃣ Don't save

The top of the correction gives the result: ✅ **Perfect!** · 👍 **Correct, but a bit unnatural.** · ⚠️ **Almost there!** · ❌ **Not quite.**

OPTION 3: SYNONYMS

Carla
@bot 3

bot
🔄 **Synonyms for stall**
stumble = to almost fail or lose momentum
Example: "The talks stumbled early on."
...

OPTION 4: SAVE

Bruno
@bot 4

bot
✅ Saved: **stall**.
Practice it any time with !practice stall, or see everything with !list.
You might like these too: **stall for time**, **grind to a halt**, **drag on**.
Add another one whenever you want: tag me with a word.

> 💡 **Tip:** the word closes by itself after 3 hours without anyone touching it, and everything done so far stays saved.

4 List, practice and removal

Everything the class adds becomes a numbered list, the same for everyone in the group.

`!list`: the class's words

Ana
!list

bot
📚 **The class's words** (23) — newest first
23. stall: travar, emperrar
22. no cap: sem mentira, falando sério
21. grind to a halt: parar aos poucos
...

💡 !practice 23 to practice one
Page 1/3 — !list 2 for more

Each word has a **fixed number** (1 is the oldest). Use `!list 2` for the next page. In classes from B1-B2 up, the list shows the English definition instead of the translation.

`!practice`: practice again

- `!practice stall` or `!practice 23`: reopens that word, with the card and the menu.
- `!practice` on its own: opens the oldest pending (not yet practiced) word.

`!delete`: remove a word from the list

- `!delete stall` or `!delete 23`.
- Only **whoever added** the word, or a bot admin, can delete it. Everyone else gets a notice.

`!group`: the class summary

Carla
!group

bot
Your class 🏫
🎯 Level: A2-B1
📚 Words: 23 (15 practiced, 8 pending)
🔁 Due for review: 6
⏰ Reminders: every weekday around 19:00 (up to 20 min earlier or later)
⏭️ Next review: today at 19:00
🏆 Weekly challenge: Fri 30 Oct at 13:00
👥 **Members** (12)
• Prof. Marina (teacher)
• Ana (student) · 14 review answers
• Bruno (student) · 9 review answers
...

`!group` shows names only, never phone numbers, and doesn't tag anyone.

5 Daily review

Every weekday, around 19:00, the bot brings words from the class list to review. Nobody gets tagged: it's an invitation for whoever is around.

1. The bot opens the round with **5 words** picked by spaced repetition: the ones that are "due" come first.
2. For each word, **anyone** answers by tagging the bot: explains the word in English in their own words or writes a sentence with it.
3. The AI gives feedback. The **first acceptable answer** takes the word, and the bot sends the next one.
4. If the answer isn't good yet, the bot gives a hint and the word stays open for someone else to try.
5. At the end, the bot sends the summary: the solid words, the ones coming back soon and the skipped ones.

EXAMPLE ROUND

bot
⏰ **Practice time** — 5 words to review.

bot
🔁 1/5 · **stall**
Explain it in English in your own words, or write a sentence using it (tag me to answer).

Anyone can answer · tag me with skip for the next word · skipall to stop the review

Bruno
@bot it's when you stop

bot
💬 **Bruno** answered:
❌ Close, but too vague: stall is about progress stopping.
💬 Try: "It means to stop making progress."

The word is still open — anyone can try again, or !skip.

Ana
@bot My English stalled when I stopped watching series

bot
👏 **Ana** answered:
✅ Great sentence! "Stalled" shows your progress stopped.

🔁 2/5 · **no cap**
...

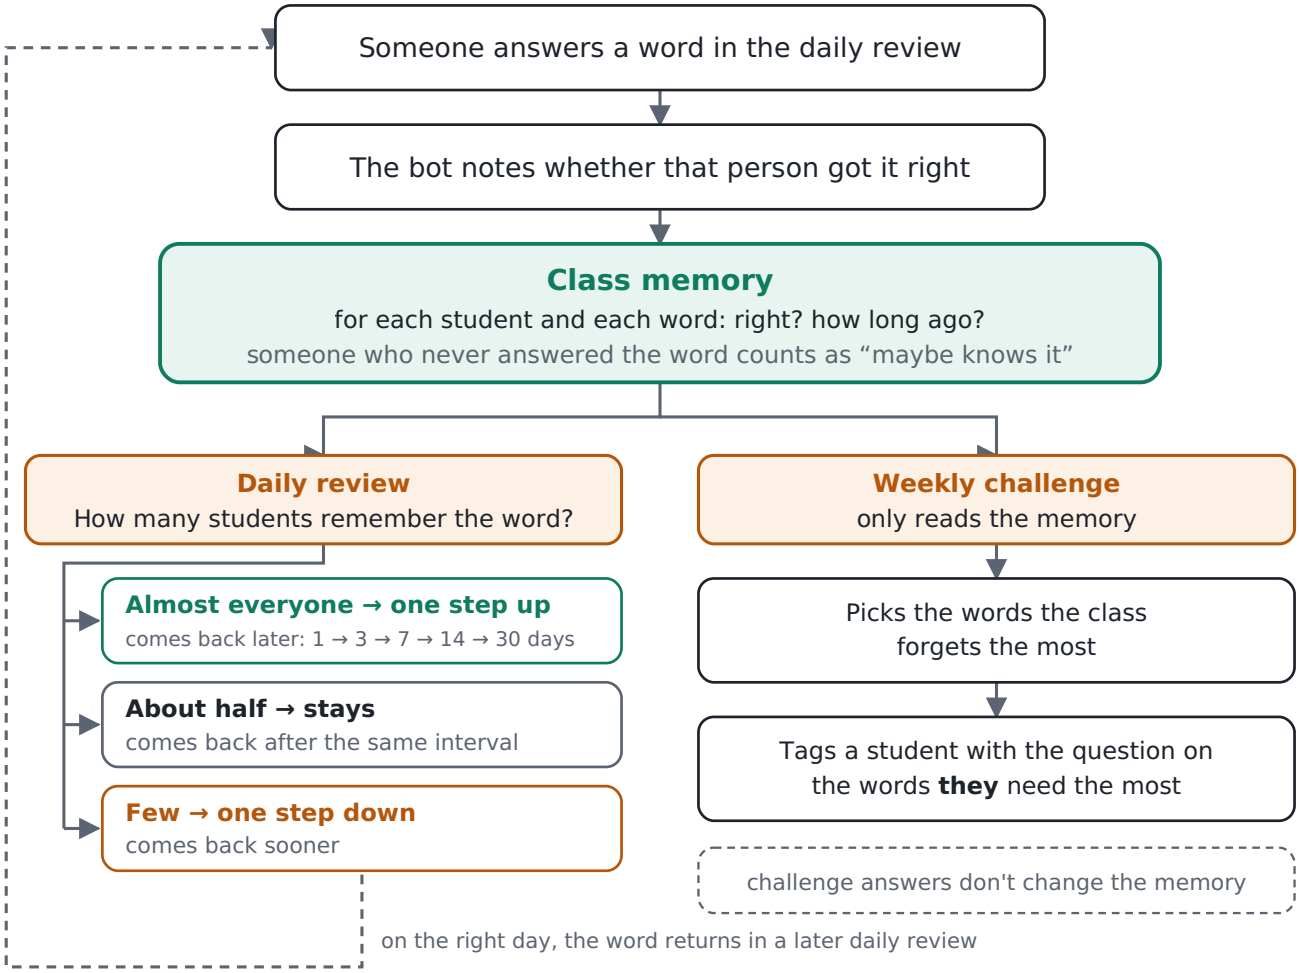

END OF THE ROUND

bot
🎉 **Practice done** — 5 reviewed.
✅ Solid: stall, no cap, drag on
🔁 Coming back soon: grind to a halt
⏭️ Skipped: breakthrough
Add a new word whenever you want: tag me with a word.

How the bot decides when each word comes back

Everyone remembers words at their own pace. That's why the bot keeps a **class memory**: for each student and each word, it knows whether that person got it right or wrong in the daily review, and how long ago. As the days go by, the chance of remembering drops.

- A word only starts coming back later once **almost the whole class** has shown they remember it, not just whoever answered fastest.
- Wrong answers count too: if several people get it wrong, the word comes back sooner.
- Only people who take part in the daily review count. Someone who only reads the group doesn't hold the class's words back.

This is **spaced repetition** (the idea behind Anki), adapted for a class: what the class already knows shows up less and less, and what someone still forgets comes back soon.

Commands during the review

COMMAND	WHAT IT DOES
`@bot` + answer (or `!` + answer)	Answers the current word.
`!skip` or `@bot skip`	Skips the word; it comes back in a later review.
`!skipall`, `!stop` or `!0`	Ends the round and shows the summary.
`!review`	Starts a round right away, without waiting for 19:00.
`!daily`	Shows the time and the next review.

Automatic rules

- The time can vary by up to **20 minutes** earlier or later.
- The round **closes by itself** after 3 hours without any message in the group.
- After **3 reviews in a row with no answers**, the bot pauses the daily review. Any message from the class turns it back on.
- If the class has no words yet, the bot stays silent.

`!DAILY` : SEE THE SETTINGS

Carla
!daily

bot
⏰ **Daily review**
🕐 every weekday around 19:00 (may arrive up to 20 min earlier or later)
📚 5 words per review
⏭️ Next one: today at 19:00
Admins can change it: !daily 19h · !daily weekends on · !daily off

🛠️ **Admins only:** `!daily 20h` (time), `!daily weekends on` (includes Saturday and Sunday), `!daily size 3` (words per round; `size auto` goes back to the default), `!daily off` / `!daily on`.

6 Weekly challenge

Once a week (default: **Friday, around 13:00**), the bot creates open questions with the class's vocabulary, at the class's level, and tags one student per question.

1. The AI picks up to 15 words from the list, favoring the ones the class **forgets the most** (from the class memory, section 5).
2. It creates **one question per student** (up to 10). Teachers and admins are never tagged.
3. Each question starts by tagging that turn's student, who gets the question with the words **they** most need to review. Students take turns from one week to the next.
4. **Anyone can try** and gets feedback, but the question only moves on when **the tagged student** answers or someone skips.
5. The answer has to make sense for the question. Using the class's words isn't required, but it makes the answer better.

EXAMPLE

bot
🏆 **Weekly challenge** — 3 questions, one student each.
I'll tag who answers. Anyone can try, but I only move on when the tagged person answers, or someone skips.

bot
@Ana What would you do if a project you care about **stalled** for weeks?

/1 Explain the question
/2 Listen to the question
/3 Skip this question
🏆 Weekly challenge · 1/3 — tag me to answer

Ana
/1

bot
🇧🇷 O que você faria se um projeto importante para você ficasse parado por semanas?
🇺🇸 Imagine a project you love stopped moving forward. What would you do?

Bruno
@bot I would talk with the team

bot
✅ **Bruno**: Good idea, and clear!
⏳ Nice try! I'm still waiting for @Ana (or a skip).

Ana
@bot I would find out why it stalled and ask for help

bot
🌟 **Ana**: Great answer! You used "stalled" naturally.

bot
@Carla ...

The menu for each question

OPTION	WHAT IT DOES
`/1` (or `@bot 1`)	Explains the question. In A1-A2 and A2-B1 classes, first in 🇧🇷 Portuguese and then in 🇺🇸 English; from B1-B2 on, English only.
`/2` (or `@bot 2`)	Sends the question as audio, for listening practice.
`/3` (or `@bot 3`, `!skip`)	Skips the question and moves on to the next student.
`!skipall`, `!stop`, `!0`	Ends the challenge with the summary.

END OF THE CHALLENGE

bot
🏁 **Weekly challenge done** — 2 of 3 answered.
⏭️ Skipped: 1
Add new words any time: tag me with a word.

Rules

- The challenge only **reads** the class memory: its answers don't change when words come back in the daily review. They count toward the participation ranking.
- It closes by itself after 3 hours without any message in the group.
- If the daily review and the challenge fall at the same time, the challenge comes first.
- The time can vary by up to 20 minutes earlier or later.
- `!weekly` shows the day, the time and the next challenge.

🛠️ **Admins only:** `!weekly mon 9h` (day and time), `!weekly size 3` (number of questions; `size auto` goes back to one per student), `!weekly off` / `!weekly on` and `!weekly now` (starts the challenge right away).

7 Engagement ranking

The ranking shows who took part the most. Admins get the ranking as a PDF in private chat with `/ranking`.

What earns points

✅ **Counts**

- Each answer in the **daily review**.
- Each answer in the **weekly challenge**, even if you're not the tagged student.
- Every attempt counts, including the ones that got ❌.

❌ **Doesn't count**

- Adding words.
- Practicing a word outside the review (menu 2-5, free sentences).
- Teachers, admins and the owner: they stay out of the ranking.

How the order works

RANKING	CRITERIA
Top 20 students (all classes)	1st total answers · 2nd distinct days with participation · 3rd accepted answers (no ❌)
Top 10 classes	Answers **per enrolled student**, so small classes compete on equal terms. Also shows the total and how many students took part.
Top 3 in each class	Same criteria as the student top list, within each class.

> 💡 **To climb the ranking:** taking part a little **every day** is worth more than a lot on a single day, since days with participation break ties. Answering well helps too.

Example calculation

CLASS	STUDENTS	ANSWERS	PER STUDENT	POSITION
Tuesday 7pm Class	6	90	**15.0**	🥇 1st
Saturday Class	12	132	**11.0**	🥈 2nd

The Saturday class has more answers in total, but the Tuesday class comes first because each student took part more.

How an admin asks for the ranking

Admin (in the bot's private chat)
/ranking 2

📄 **ranking.pdf** · 📊 Engagement ranking · last 2 months

- `/ranking`: last 6 months (default). `/ranking 2`: last 2 months (from 1 to 24).
- The PDF includes each student's saved name and number, the total, the active days and the class. That's why it stays with the admins only.
- The class name in the ranking is the WhatsApp group name.

8 Class level and audio

Class level: `!level`

Each group has a level, which calibrates the definitions, examples, corrections and challenge questions. The word itself can be at any level.

LEVEL	DOES PORTUGUESE APPEAR?
A1-A2 · A2-B1	Yes: the 🇧🇷 line on the card and in the list, and the challenge explanation in Portuguese before the English.
B1-B2 · B2-C1 · C1-C2 · C2	No: everything in English.

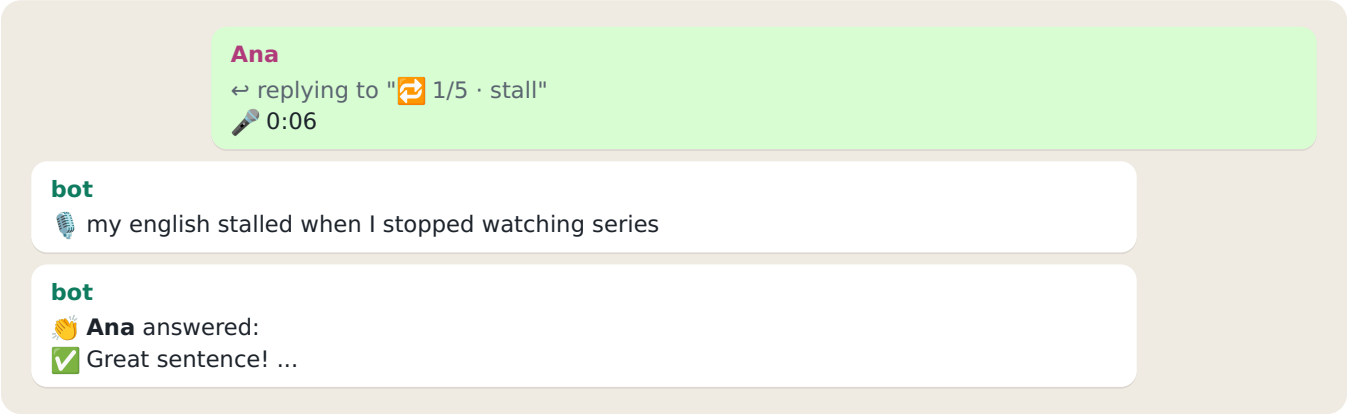

- `!level`: anyone can see the class level.
- `!level B1-B2`: only the teacher can change it.

Audio pronunciation

- Each new word comes with **two voice notes**: the word and the example sentence.
- In the weekly challenge, `/2` reads the question out loud.

Answering by voice

Prefer to speak? Record a voice note **replying to (quoting) a bot message**. It transcribes what you said and treats it like a written message. Great for speaking practice.

> Voice notes up to **60 seconds**. A voice note that doesn't reply to a bot message is ignored, like any group conversation. The bot transcribes exactly what it heard, without correcting it.

9 All group commands

Every command works with `!` or with `/`. A command that doesn't exist gets the group help.

COMMAND	WHAT IT DOES	WHO
`@bot word` `!add word`	Adds a word (with context: `stall | the talks stalled`; with a meaning: `stall | to delay on purpose`).	everyone
`@bot 2` · `3` · `4` · `5`	With an open word: examples, synonyms, save, discard.	everyone
`@bot` + sentence	Corrects a sentence with the open word, or answers the review or the challenge.	everyone
`!list [page]`	The class's words, numbered.	everyone
`!practice [word|number]`	Reopens a word (no argument: the oldest pending one).	everyone
`!delete word|number`	Removes a word from the list.	who added it admins
`!review`	Starts a review right away.	everyone
`!skip` · `!skipall` · `!0`	Skips the word or question · ends the activity · leaves the open word.	everyone
`!daily`	Shows the daily review settings.	everyone

`!daily 19h` · `on` · `off`
`!daily weekends on|off`
`!daily size N|auto`
	Changes the time, turns it on/off, includes the weekend, changes the round size.	admins

`!weekly`	Shows the weekly challenge settings.	everyone

`!weekly fri 13h` · `on` · `off`
`!weekly size N|auto` ·
`!weekly now`
	Changes the day and time, turns it on/off, changes the number of questions, starts right away.	admins

`/1` · `/2` · `/3`	In the challenge: explain, listen, skip the question.	everyone
`!level`	Shows the class level.	everyone
`!level B1-B2`	Changes the class level.	teacher
`!group`	Class summary: level, words, reviews and members.	everyone
`!help` or `@bot` on its own	The group help.	everyone
`!activate`	Turns the bot on in the group. The class name is the WhatsApp group name.	admins
`!deactivate`	Turns the bot off in the group (the words stay saved).	admins
`!teacher @person` `!student @person`	Makes the person a teacher in every group (repeating undoes it) · makes them a student again.	admins

"Admins" are the bot's administrators (not the WhatsApp group admins) and the bot's owner.

10 Private chat commands (admins only)

The bot's private chat is the administrators' control panel. Students who message it there get no reply.

COMMAND	WHAT IT DOES	WHO
`/groups`	Lists the active groups split by level (🟢 A1-A2 and A2-B1 · 🔵 B1-B2 and B2-C1 · 🟣 C1-C2 and C2), with the number of students in each class, and the groups still waiting for an `!activate` (with the hours until the bot leaves).	admins
`/groups off 2`	Turns off group no. 2 on the list (the numbering follows the order by level).	admins
`/teachers`	Lists the teachers.	admins
`/teachers 5531999998888` `/teachers add|remove NUMBER`	Adds a teacher in every group (repeating the number removes them).	admins
`/ranking [months]`	The engagement ranking PDF (default: 6 months; from 1 to 24).	admins

Numbers go as digits only, with country and area code: `5531999998888`. Any other message from an admin in private chat gets the command list.

EXAMPLE

Admin
/groups

bot
🏫 **Active groups** (3/10)

🟢 **A2-B1**
1. Tuesday 7pm Class — 6 students
2. Saturday Class — 12 students

🔵 **B1-B2**
3. Conversation Club — 8 students

⏳ **Waiting for a !activate** (I leave when the time runs out)
• New Class — 20h left

Turn one off with /groups off 1.

How to add the bot to a new class

1. A WhatsApp group admin adds the bot's number to the group.
2. A **bot admin** sends in the group: `!activate`. The bot uses the WhatsApp group name as the class name.
3. The bot confirms and the class can start using it: `!help` shows the commands.
4. Set the level: `!level A2-B1`. Mark the teachers with `!teacher @person` (or `/teachers NUMBER` in private chat).

> If nobody sends `!activate` within **24 hours**, the bot leaves the group on its own, without sending a message.

11 Limits and FAQ

Usage limits

To keep the bot fast and free during the trial, it has a few limits. When a limit is reached, the bot warns once and stops replying until the limit resets.

LIMIT	VALUE	BOT'S NOTICE
Messages per person per minute	6	⏳ Easy there! I can't keep up that fast...
Messages per person per day	150	⏳ You've reached today's limit...
Messages per group per day	400	⏳ This group has reached today's limit...
Message length	500 characters	The bot asks for a shorter message
Audio per person per day	10 minutes (60 s per voice note)	🎙️ You've used up today's voice-message time...

The class's normal conversation doesn't count toward these limits: only what's meant for the bot.

Frequently asked questions

SITUATION	WHAT TO DO
I sent a message and the bot didn't reply.	Did you tag the bot (`@`) or start with `!` / `/`? Without that, it treats it as class conversation.
I messaged the bot in private chat.	The bot doesn't reply to students in private chat. Use the class group.
"There's an activity going on right now."	A review or challenge is in progress. Finish it, or send `!0` to end it.
I want to learn another meaning of the word.	`@bot stall | to delay on purpose`.
I added the wrong word.	`@bot 5` right after the card, or `!delete word` later.
The challenge tagged someone who isn't online.	Others can try answering; to move on, someone sends `/3` and the question goes to the next student.
The daily review stopped showing up.	It pauses after 3 rounds with no answers. Any message from the class turns it back on, and `!review` starts one right away.
The bot said it's "taking a break".	The day's (or the group's) AI budget ran out. It comes back the next day.

🚀 **To make the most of the 2 months:**

- Every new word from class becomes an `@bot word` in the group.
- Answer the 19:00 review, even if it's just one word a day.
- On Friday, keep an eye on the challenge: when the bot tags you, the class waits for your answer.
- Write sentences about your own life: the bot corrects them and you learn to really use the word.
